

Multi6 WG Update @IPv6 WG, RIPE-46

Kurtis Lindqvist
<kurtis@netnod.se>

So...

- ...the Multi6 WG actually met in Vienna!
 - And was very popular
- 13 drafts presented
- Very different paths
- Intention was not make a decision on any given path
 - More to try and catch up

Outcome

- Before the meeting a design team under Tony Li was formed
 - Presented three paths, Tunnel, Small, Big
 - All based on some form of id/loc separation
- In Vienna another design team was formed under Christian Huitema
- Reason being disagreement on where/how id/loc separation should happen

Outcome2

- Address portability; ID/LOC separation; Routingtable bloat etc are all popular sports....
- IAB Open session in Vienna
 - IAB will present a report
- Site-local / scoped addresses in IPv6-WG
- Session layer on the IETF list

Next steps

- From where I sit, it looks like we are going to id/loc
- Question is where, how and when...
- In Minneapolis the two design-teams are scheduled to present

The big thing!

- How do we chose?
- Multi6 WG decision
- IESG?
- IAB?
- IETF Plenary?
- All of the above?

- To be continued....
